

CERTIFICAT ISO 14001

Certifie conforme a ISO 14001.

This Agreement may not be assigned, in whole or in part, by either Party without the prior written consent of the other Party. Any unauthorized assignment shall be void and of no effect.

Pursuant to the Group's disclosure obligations, this matter must be reflected in the notes to the consolidated financial statements as a contingent liability, without specifying the provision amount to avoid prejudicing the Group's position.

The Supplier shall maintain a traceability system enabling identification of raw materials, manufacturing operations, and quality inspections for each delivered Product. Records shall be retained for a minimum of ten (10) years.

The legal risk analysis has been conducted in accordance with IAS 37 principles concerning provisions, contingent liabilities, and contingent assets. The probability of the risk materializing has been assessed on a three-tier scale: probable, possible, or remote.

The conclusions of this legal analysis are subject to legal professional privilege and must not be disclosed to third parties without the prior approval of the General Counsel.

Neither Party shall, during the Term and for twelve (12) months thereafter, directly or indirectly solicit or hire any employee of the other Party who was involved in the performance of this Agreement.

Each Party shall comply with all applicable laws and regulations, including without limitation anti-bribery legislation (UK Bribery Act 2010, US FCPA), data protection laws (GDPR, UK Data Protection Act 2018), and export control regulations.

The risk of an adverse costs order has been factored into the provision estimate, with additional exposure estimated at between GBP 50,000 and GBP 150,000.

Environmental conditions during functional testing were within specification: temperature 23 +/- 2 degrees C, relative humidity 45 +/- 10%, hydraulic fluid cleanliness class 6 per NAS 1638.

The solution heat treatment and ageing cycle was carried out as prescribed: solution at 940 degrees C for 2 hours, water quench, followed by ageing at 540 degrees C for 8 hours, air cool.

The CAPA opened in response to the recurring non-conformity includes the following actions: supplementary supplier audit, enhanced receiving inspection, and qualification of an alternative supplier.

Any amendment to this Agreement shall be in writing and duly executed by authorized representatives of both Parties. No oral modification or waiver shall be binding upon either Party.

The Legal Department has identified a contagion risk, as the facts underlying the claim may be replicated at other production sites within the Group.

The matter will be monitored by the Legal Department in coordination with external counsel. A progress update will be presented to the Audit Committee at its next quarterly meeting.

Effectiveness verification of the corrective actions will be performed over the next three production lots. The CAPA will be closed after confirming no recurrence over a minimum of 150 parts.
